

<https://redink.ai>

The diagram illustrates the Inky AI interface, showing various features and their locations. The interface is divided into several sections: a top bar with navigation icons, a left sidebar with a list of features, a central workspace, and a right sidebar with additional tools. Arrows connect the feature names in the left sidebar to their corresponding locations in the interface.

Left Sidebar Features:

- Anonymize Text (AI)
- Anonymize Text (terms)
- Propose PDF Redactions
- Finalize PDF Redactions
- Edit Instructions
- Check Document for II
- Switch a Party
- Markup
- Bubbles: / Reply:
- Replace: / Append:
- Clipboard: / Pane: / Newdoc: / Slides:
- Prompt library
- {doc} / (file) / (clip) / (adddoc)
- (rev[:author])
- (nf), (kf), (kpf), (sar)
- (multimodel)
- (net)
- (lib)
- Settings

Central Workspace Features:

- Shorten
- Freestyle
- Discuss with AI
- Transcribe
- Chat with AI
- Help me, Inky
- Remove Content Controls
- Import the text

Right Sidebar Features:

- Two languages preconfigured
- Correct spelling and other mistakes
- Improve
- Redraft existing text
- Use a another model
- Context Search
- Analyze
- Compare
- Calculate the time
- Search and replace
- Convert Markdown to Word formatting
- Clipboard to Text
- Accept formatting changes

Other Features:

- CTRL-P for last prompt
- Improve (in top bar)
- Apply MyStyle
- No Filler Words
- More Friendly
- More Convincing
- Apply Comment
- Apply Comment To Para
- Apply Comment (Edit)
- Apply Comment To Para (Edit)
- Filibuster (Expand Text)
- Summarize
- Explain
- Argue Against
- Suggest Titles
- Sum-up Revisions
- Special Service
- Document Check
- Find Clause
- Add Clause
- Create Podcast
- Create Audio
- Define MyStyle
- Run WebAgent
- Edit WebAgent
- Find Hidden Prompts
- Self-Compare Selection
- Compare Active Docs
- Accept Format Changes
- Markup Time Span
- Regex Search & Replace
- Import Text File
- Convert Markdown
- Remove Content Controls
- Clipboard to Text

The diagram illustrates the Inky application architecture and its features. It is divided into several sections:

- Installation (use Edge Browser):**
 1. Get API-Key (e.g., OpenAI)
 2. Go to redink.ai, "Downloads"
 3. Button to install each add-in
 4. Start Office and enter API key
- Markup:** for having the model's output shown also as a markup, using either **Diff**, **DiffW** or **Word** to do the compare
- (clip)** to add the object in the clipboard
- Clipboard: / Newdoc:** to get the model's response in a separate window and the clipboard
- Replace:** for having the model's output replace your selected text
- Translate to English** (configurable standard language for translations); also works in the e-mail overview
- Translate to any other language** as supported by your model
- Correct** spelling and other mistakes in your own writing
- Summarize** a text or an entire e-mail-chain with the amount of words you define
- Freestyle** lets you freely prompt your model with or without your selected text
- Prompt library** for complex or often used prompts
- (2nd) to use more models** if configured by you (e.g., for special tasks)
- Clipboard to Text** Have any text in a clipboard object (e.g., screenshot, audio, video, PDF) extracted
- Browser Extension** uses add-in
- Improve** your own writing in various ways: Make it more concise and logical, remove filler words and redundancies or make it more friendly or more convincing
- Shorten** the text you have selected by a certain percentage
- Get a summary** of your e-mail chain in one sentence and more details by participants (also works for one or several mails in the e-mail overview)
- Have a reply drafted** by the model based on your instructions and the e-mail chain
- MyStyle** Define writing styles based on your mails (and have the styles applied to your text)

The central part of the diagram shows a list of features with icons:

- English
- Translate
- Correct
- Improve
- Shorten
- Summarize
- Sum-up
- Reply
- Freestyle
- Clipboard to Text
- Define MyStyle
- Help me, Inky
- Settings

Arrows indicate the flow of data and interactions between these features and the other sections.

Translate to English
(configurable standard language for translations)

Translate to German
(second configurable standard language for translations)

Translate cells with text to any other language
as supported by your model

Translate also the text within formulas of cells
as supported by your model

Anonymize
your text with regard to individuals, but also company names

Switch a Party
mentioned in your text with another one (e.g., Elvis Presley to Taylor Swift)

Freestyle
lets you freely prompt your model for tasks related to your worksheet; select those cells that shall be considered

Prompt library
for complex or often used prompts

TextOnly:
if only cells with text shall be treated (cell by cell)

Batch:
Process all text files in a directory with a prompt

Automatically implements proposals
made by the model on how to do something within your worksheet (e.g., which formula to include where)

Bubbles: / Pane:
have the model comment your cells or output in a pane

CellByCell:
have the model process each selected cell individually

Change settings
also includes installation of local helper app and updates

Correct
spelling and other mistakes in your own writing

Write neatly
create based on keywords in a cell a coherent, concise and easy to understand text, taking into account (also context provided by you, if any)

Shorten
the text of the cells you have selected by a certain percentage

Analyze CSV
will have the AI process large CSV files based on your instruction and provide corresponding report

Data Extractor
will process text documents (Word, TXT, PDF) based on pre-defined instructions and create a tabular report based on the analysis

Rename Files
based on their content (text files only)

Adjust the height
of cells based on their text content even if they have been merged

Adjust size
of legacy notes

Search and replace
within the text of the selected cells using one or multiple Regex commands, which go far beyond Excel's own search & replace

Chatbot
to discuss your worksheet with the LLM; (adds) for more worksheets

Undo the last AI insert
