## **Red Ink for Word** Main menu (also: quick access tile) With the Red Ink Helper (VBA) you get: **Translate to English** · Context menu (right-click on text) (first configurable standard English · Configurable keyboard shortcuts language for translations) Correct German Translate to German spelling and other mistakes (second configurable standard in your own writing language for translations) Translate Improve Translate to your own writing in various ways: Correct any other language Make it more concise and logical, as supported by your model remove filler words and Improve redundancies or make it more Anonymize friendly or more convincing or your text with regard to individuals, but apply Word comments Shorten also company names Switch a Party Anonymize the text you have selected mentioned in your text with another one Have your text analyzed, (e.g., Elvis Presley to Taylor Swift) QR Switch Party ncluding creating a podcast or audio file out of it Markup: > Analyze for having the model's output applied as a markup, using either Diff, DiffW, □ Summarize Freestyle **Special Service** Word or Regex to do the compare e.g., 3rd party Explain **Bubbles:** Freestyle (2nd) Clipboard: / Pane: Suggest Titles for having the model's / Newdoc: / Slides: Special Service output applied as Context Search redirect the output Word comments Create Podcast to a window, pane or new document (1)) Create Audio Word Helpers > Replace: / Append: or extend an whether the model's & Anonymization existing pptx file 2 Chatbot output replaces your text or is added to it Use a another model Transcriptor if configured by you (e.g., for special tasks) Settings Context Search Freestyle CTRL-P for a text to find not only lets you freely prompt your last prompt verbatim hits model with or without your **Transcribe** Chat with an LLM selected text live meetings and recordings that can even directly Compare and have them processed alter a text, if asked Prompt library two, four, six etc. for complex or often paragraphs within the same used prompts (rev[:author]) Accept formatting document with each other changes marked in for having the model analyze revisions of "track changes", but your text only those Self-Compare Selection (lib) for implementing Calculate the time Accept Format Changes that was required by an your instructions on author to perform the the basis of your (L) Markup Time Span own knowledgebase markups and comments on & Regex Search & Replace (text file-based the text library) {doc} / (file) / (clip) Import Text File Search and replace to include the text or within your text using one or (nf), (kf), (kpf), (sar) content of an external Clipboard to Text multiple Regex commands for applying various file into your (they go far beyond Word's formatting commands instruction own search & replace) (net) for having the model search the Import the text Clipboard to Text Internet for implementing your of another Word, PDF or other text file instructions

## **Red Ink for Outlook**

**Red Ink for Excel** 

{doc} / (addws) / (file) /

(clip) / (color)

Add a text document,

another open worksheet, a

file, the clipboard content

or detect cell colors

Prompt library

for complex or

often used prompts

TextOnly:

if only cells with

text shall be treated

(cell by cell)

Translate to English

(configurable standard language for translations)

Translate to German

(second configurable standard language for translations)

Translate cells with text to any other language

as supported by your model

Translate also the text within formulas of cells

as supported by your model

lets you freely prompt your model for

tasks related to your worksheet; select

those cells that shall be considered

**Automatically implements proposals** 

made by the model on how to do something within

your worksheet (e.g., which formula to include where)

Anonymize

your text with regard to individuals,

but also company names

Switch a Party

mentioned in your text with

another one (e.g., Elvis

Presley to Taylor Swift)

**Bubbles: / Pane:** 

have the model

comment your cells

or output in a pane

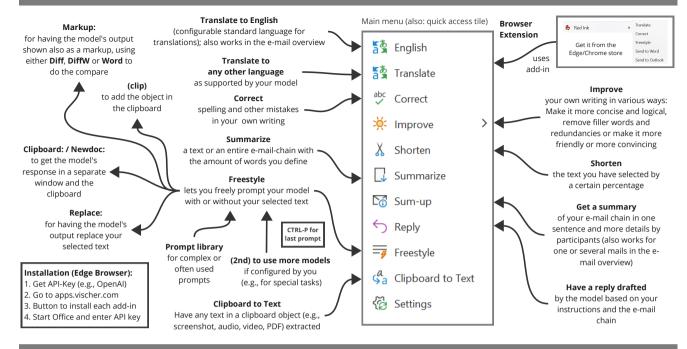

CellByCell:

have the model process each

selected cell individually

CTRL-P for

last prompt

Main menu (also: quick access tile)

2 Chatbot

Chatbot

to discuss your

worksheet with

English

German

Translate (text)

Translate (cells)

Write Neatly
